Planetary

Planetary is a puzzle adventure game, following an astronaut named Marsh Onn on his mission to find alien life. His Teleportal gets broken off by a meteor preventing him from returning to Earth. Marsh must search the nearby planets for the pieces of his Teleportal to repair it. Join Marsh in this crazy journey that is out of this world.

Gameplay

In his journey, Marsh Onn visits three planets on his quest to find the Teleportal parts. Each planet is vastly different from the others. The first planet is a desert called Banett. Bannett is incredibly hot, so the only way to prevent overheating is to hide in the shade. Marsh must trek through the desert and find a desert temple. The astronaut then must explore the temple and solve the puzzles to get to the first Teleportal part. The next planet dubbed Requile is a planet full of islands and a gigantic sea. Converse with a local as they assign you tasks to get you parts to build a boat. Marsh must go through critters and plants to make the boat, but once he makes the boat, he can sail to another deserted island to get to the next part. The final planet is called Urbany. This planet is a huge city, where you must sneak into an enemy base to get the teleportal part. After avoiding guards, and cameras, and maneuvering through the base, you will finally be able to get the last part of the Teleportal stored in the building. Finally, after acquiring all the parts Marsh must head to the Sun! The final level requires Marsh to get on his ship and traverse through an obstacle course of a star. Marsh must dodge and avoid the tons of fireballs and other obstacles to make it to the core. After a challenging level,

Marsh makes it to the center of the Sun where Marsh then reforges the Teleportal and can go back home.

Mechanics and Benefits

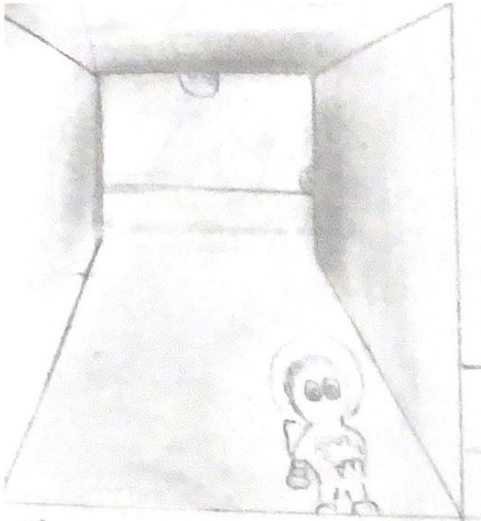
In this top-down game, the player can use the W, A, S, and D controls or arrow keys to control the directional movement of the player. The player can use the E button to interact with chests, locals, and a multitude of other objects. And finally, the Q button will be to zoom into a map.

According to a study conducted by Nanyang Technological University, puzzle video games help people improve decision-making and environmental awareness. With that in mind, we decided to make Planetary focus on having the player complete challenging puzzles. We did this because puzzle games have been proven to help people of all ages build and retain brain matter and activate parts of the brain associated with advanced problem-solving. This type of activity can improve cognition as people age. The only issue with this is that only 18% of people in the world speak English. This makes the game not accessible to most of the world, so to fix this, we added support for some of the major languages spoken around the world to cater to people that are not fluent English speakers.

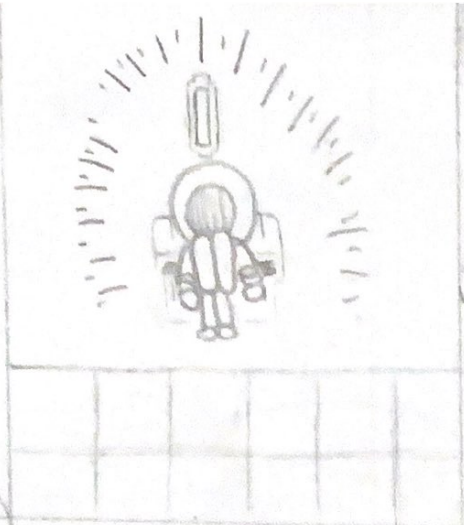
Conclusion

Planetary is a puzzle adventure game made for all ages that takes you on a journey with puzzles and adventures. You can experience the amazing worlds we created for the player along with each planet's vast aspects. With all the arduous work our team put into this, we hope you enjoy our game, Planetary. Planetary is a unique experience of a game with its different worlds and diversity in gameplay that we hope you will enjoy!

ALIEN
FIND
Marsh Onn, an adventures astronaut, was assigned to go to another Solar System to find alien life.
The first leg of the journey was succesful leaving marsh at ease.
Nothing Could go wrong-
- CRASH!!!
OH NO, his teleportal is destroyed.
Marsh Watches helplessly as his only method to return home was scattered across the three planets.
Marsh quickly rushes after his first part.
Bannett, the closest planet to the star, is an extremely hot desert causing him to stay in shacks out of heat.
But, he managed to find an ancient that he hopes contains the lost part.

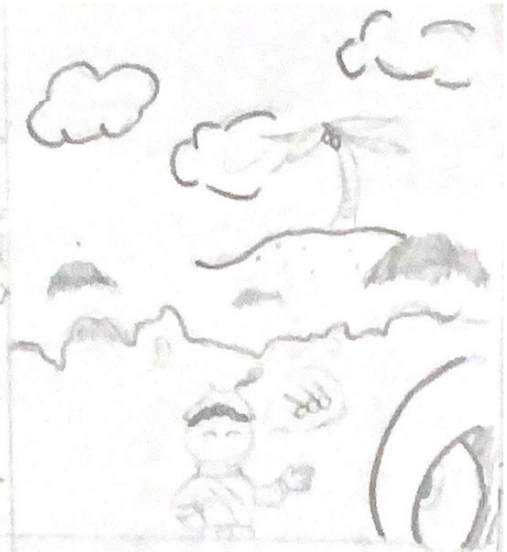


Marsh navigates the dark and treacherous temple finding fragments of some ancient directions to navigate the labyrinth.

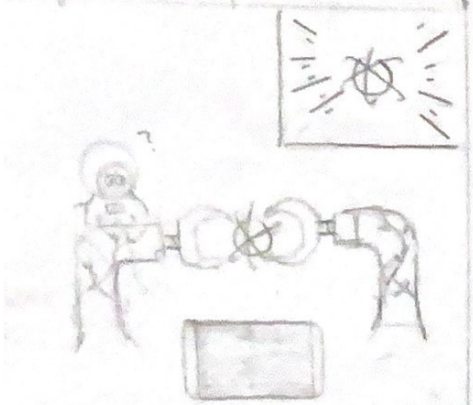


He then discovered the first missing piece of the teleporter.

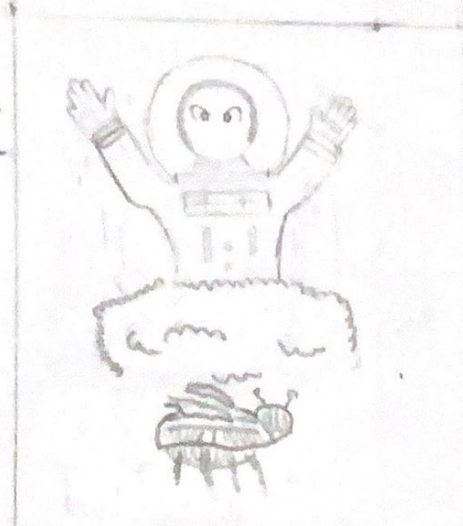
He then goes to the next planet full of vast oceans & tiny islands.



Marsh is greeted by a human inhabitant of the planet who agrees to help him build a boat to cross the ocean to find his parts.

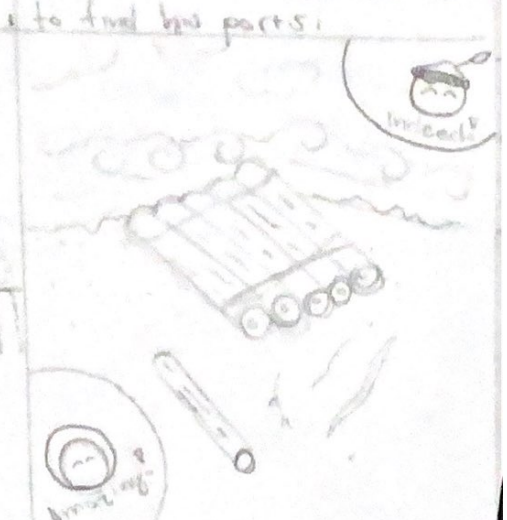


Marsh had to Solve puzzles,

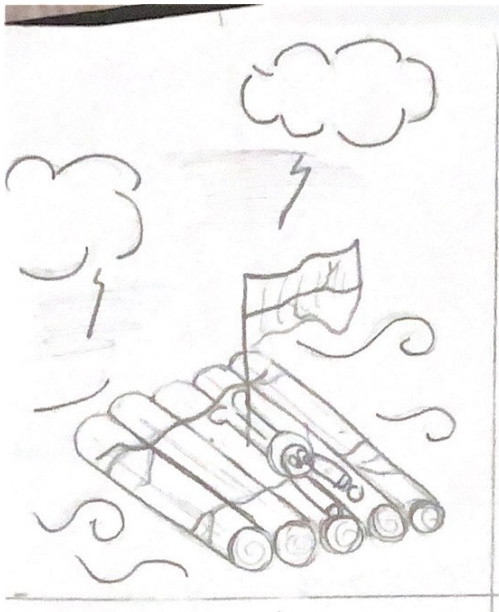


Chase Critters,

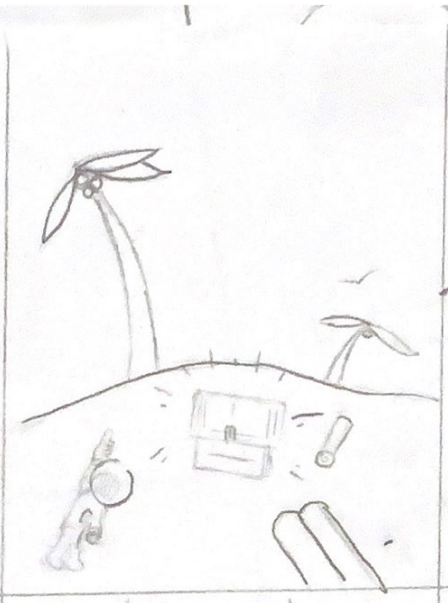
and escape Snakes.



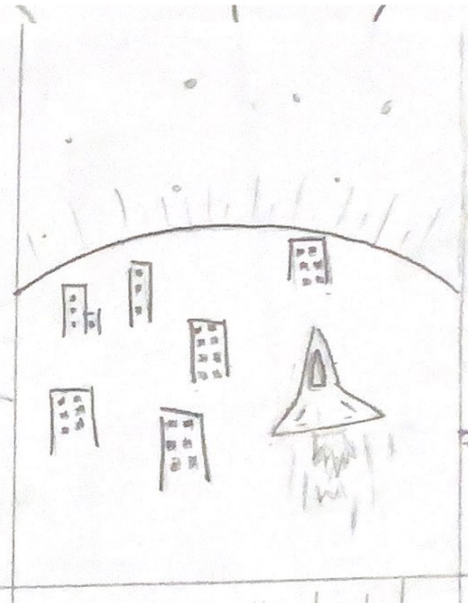
But, eventually he had all of the parts for the boat to



Marsh Sails through the dangerous waters, during a pounding hurricane.

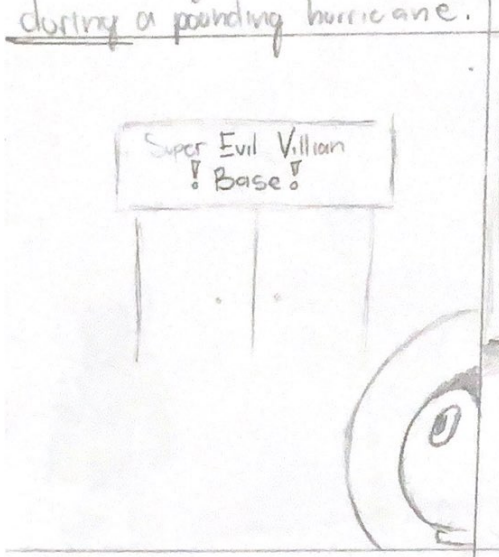


But despite the dangers, he found the second teleportal parts.



Marsh eventually landed on the next planet full of dark, abandoned cities

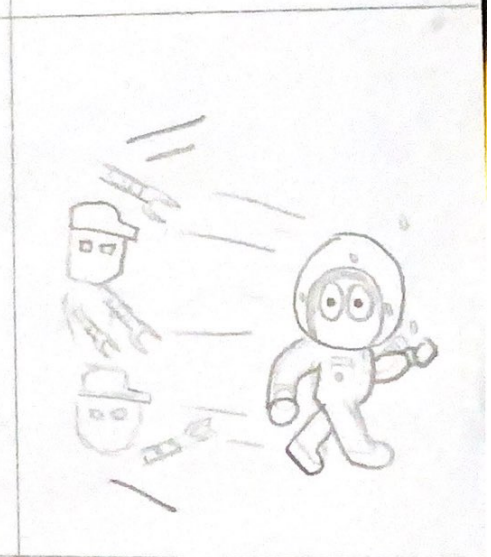
He treks the planet following streets to find some type of life



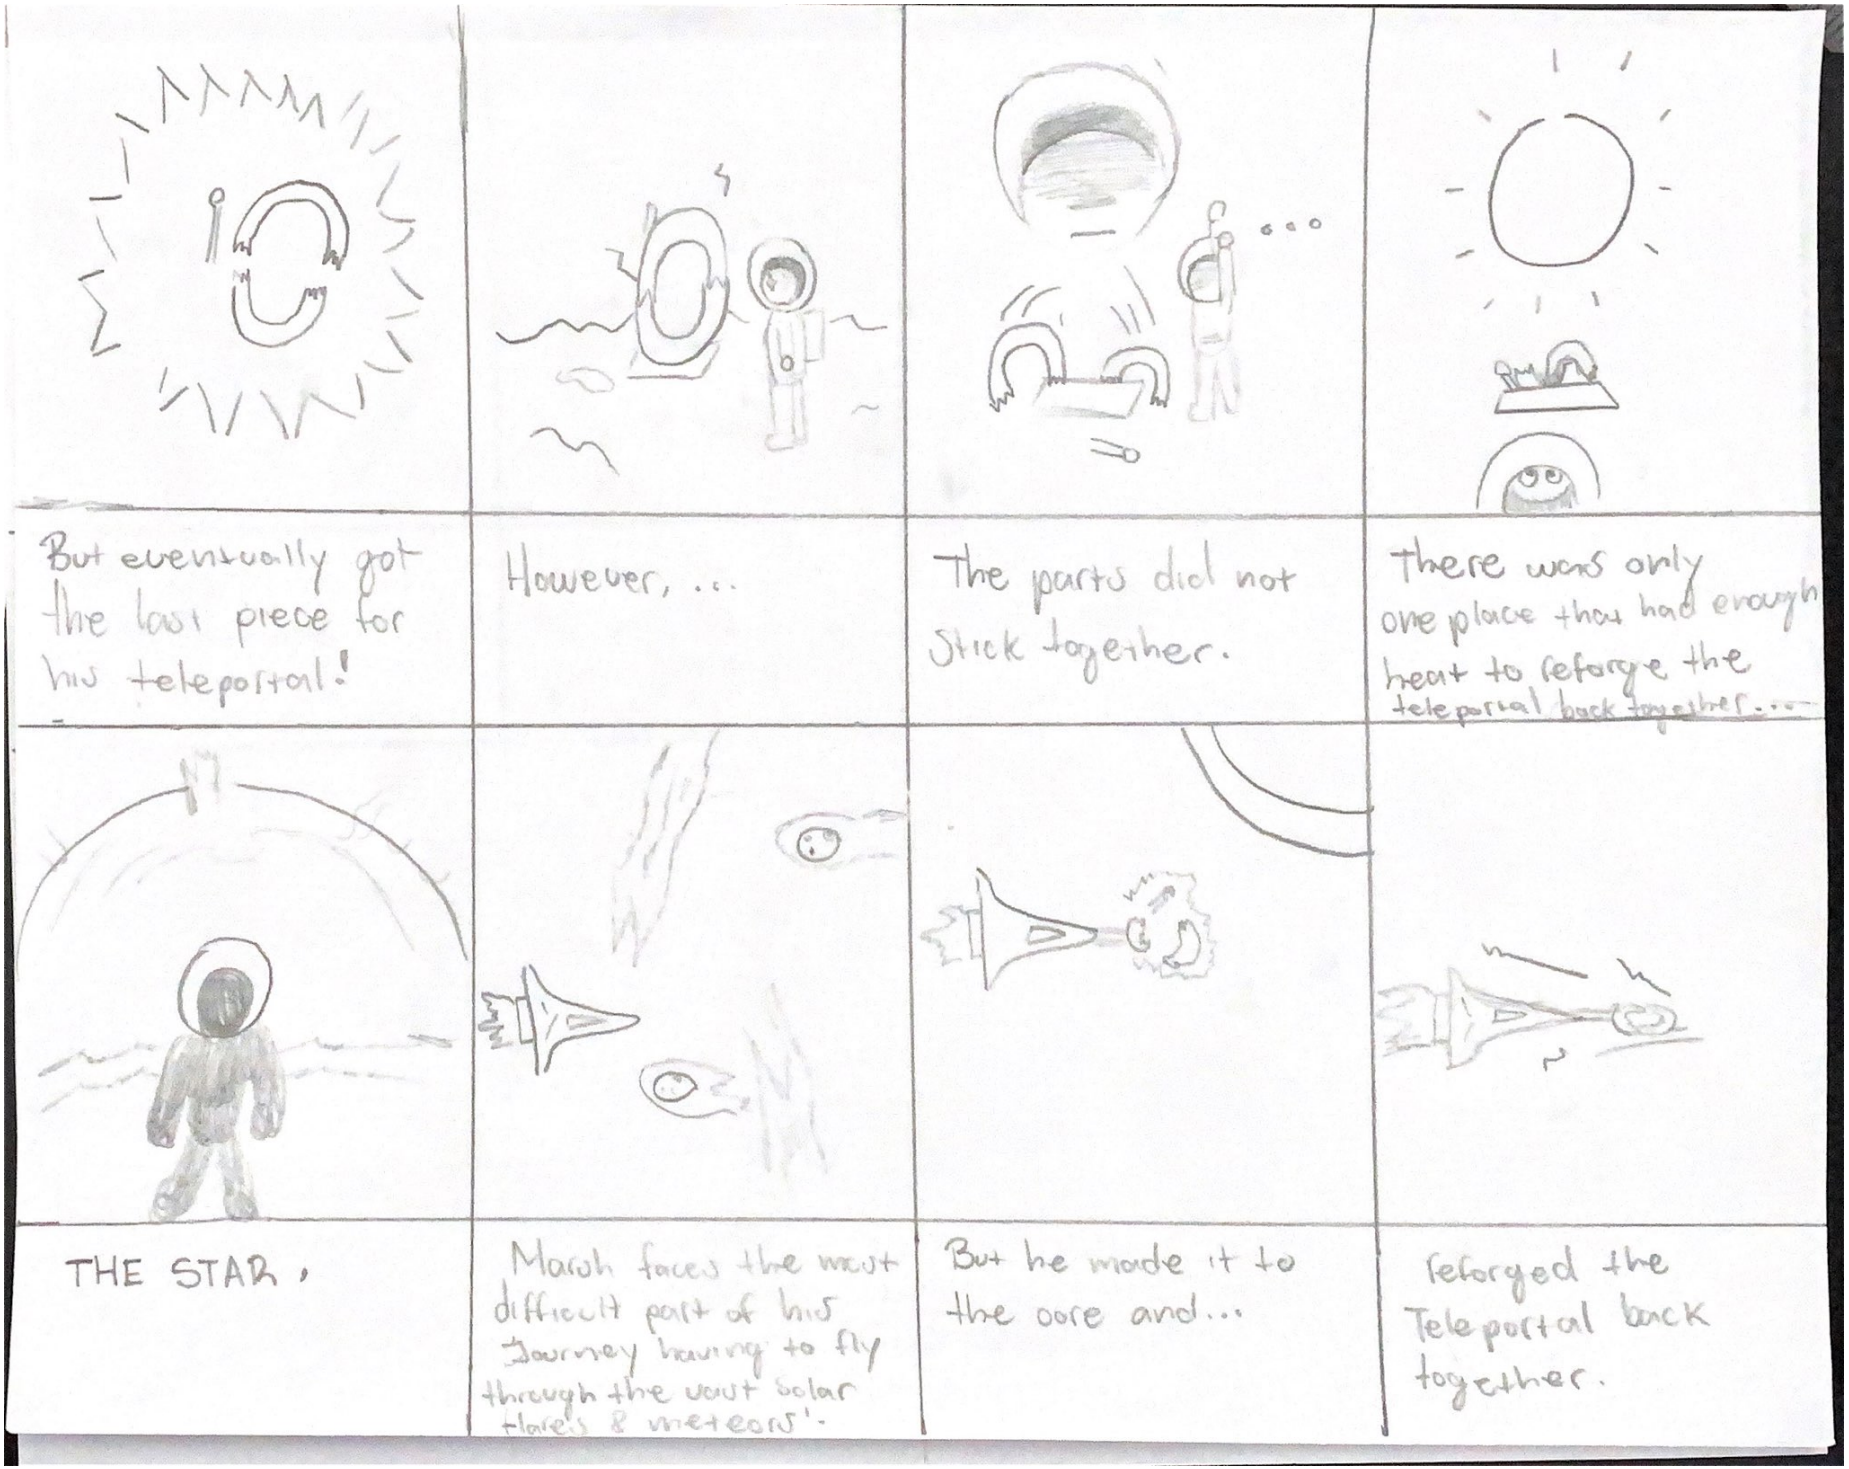
It did not take long.

However, the robot residents were hostile, but marsh knew the piece was in the building, so he continued.

He faced a vast array of complex security equipment.



And nearly got caught several times.



But eventually got the last piece for his teleportal!
However, ...
The parts did not stick together.
There was only one place that had enough heat to reforge the teleportal back together...
THE STAR.
Marsh faces the most difficult part of his journey having to fly through the vast solar flare's & meteors'.
But he made it to the core and...
reforged the Teleportal back together.

Marsh can finally go back home.
Where no one noticed he was gone at all.

Worklog

Date	Time	Involvement	Description & Involvement
10/ 3	1 hour	Artists, Coder, Game Designers, and Musician	Started production on the game designing the game.
10/4	1 hour	Coder, Artists, and Game Designers	The designers finished the game plan. The artists worked on the player
10/5	1 hour	Artists, Coder, Game Designers, and Musician	Continued the plan for the game and began building level 1 and 2
10/6	1 hour	Artists, Coder, Game Designers, and Musician	Everyone just gave of the game more detail.
10/12	1 hour	Artists, Coder, and Game Designers	The artist worked on the planets while our coder worked on the ship and the game designers made level 1.
10/13	1 hour	Artists, Coder, Game Designers, and Musician	The production of planet 2 is starting.
10/14	1 hour	Artists, Coder, Game Designers, and Musician	After the TSA elections we continued planet 1.
10/17	1 hour	Game Designers	Designed levels
10/18	1 hour	Artists, Coder, Game Designers, and Musician	The artists worked on planets and character art.
10/19	1 hour	Coder	Finished the coding of the ship
10/20	1 hour	Game Designers	The team worked on finishing the planning for the planets.
10/21	1 hour	Artists, Coder, Game Designers, and Musician	The team finished planet 1.
10/24	1 hour	Coder	Coded ship
10/25	1 hour	Artists, Game Designers, and Coder	The team started art for planet 2. With Game Designers making level 3
10/26	1 hour	Artists, Coder, Game Designers, and Musician	The team continued working on planet 2.
10/27	1 hour	Artists, Coder, Game Designers, and Musician	The team continued working on planet 2.
10/28	1 hour	Artists, Coder, Game Designers, and Musician	The team continued working on planet 2 and music is being started.

11/1	2 hours	Coder, Artists, and Musician	The team finished planet 2's art with music is in progress
11/2	2 hours	Artists and Musician	The team started planet 3's art with music in progress.
11/3	1 hour	Artists, Coder, Game Designers, and Musician	The team working on planet 3's and starting the essay.
11/4	1 hour	Coder, Musician, and Artists	The coder finished the ship coding with music in almost completed.
11/7	1 hour	Artists, Coder, Game Designers, and Musician	The team started the ship art and continued the essay.
11/8	1 hour	Coder and game Designers	The coder is working on coding planet 1.
11/9	1 hour	Artists, Coder, Game Designers, and Musician	The team worked on ship and planet 3 art, coding planet 1, and working on the essay.
11/10	1 hour	Artists, Coder, Game Designers, and Musician	The team worked on ship and planet 3 drawing, recording planet 1, and working on essay.
11/11	1 hour	Artists, Code, Game Designers, and Musician	The team worked on ship and planet 3 drawing, recording planet 1, and working on essay.
11/16	1 hour	Artists, Coder, Game Designers, and Musician	The team worked on ship and planet 3 drawing, recording planet 1, and working on essay.
11/17	1 hour	Coder and Musician	Made Music and boat mechanics
11/26	1 hour	Artists, Coder, Game Designers, and Musician	Continuation of coding the planet and ships being worked on.
11/27	1 hour	Musician and Coder	Music on level 2 is complete 3 is in production
11/28	1 hour	Artists, Coder, and Musician	Artists finished all planet 2d images and are working on actual gameplay art.

11/29	2 hours	Artists, Coder, Game Designers, and Musician	The team redesigned the Ship.
11/30	2 hours	Coder, Musician, and Artist 1	Coder finished the overall player codes with our Artist working on the planet 2 ship.
12/2	3 hours	Coder, Artist 2, and Game Designers	Game designers/game testers got inspiration for the ship and for the artist.
12/5	2 hours	Coder and Artist 1	Coder finished planet 1's coding and some of planet 1's tile set is complete.
12/8	1 hour	Game Designers and Musician	Game testers worked on the essay and the musician kept doing planet music.
1/4 – 1/23	7 hours	Artists, Coder, Game Designer, and Musician	Making sound effects, props, and story board
1/24-1/27	7 hours	Artists, Coder, Game Designers, and Musician	Robot and character mechanics, storyboard, music for planet 1&2, and props are finished
2/1 – 2/3	7 hours	Coder, and Musician	The first and last level are completed.
2/6-2/10	7 hours	Artists, Coder, Game Designers, and Musician	Levels completed and bug fixing
2/26-3/3	7 hours	Artists, Code, Game Designers, and Musician	Due to regional results, we redid storyboard and start tweaking planet 1 and 2
3/6-3/10	7 hours	Artists, Coder, Game Designers, and Musician	Worked on story board and game menu with music
3/20-3/24	7 hours	Artists, Coder, Game Designers, and Musician	Touching up the game and finishing paperwork
3/27-3/31	7 hours	Artists, Coder, Game Designers, and Musician	Finished game and paperwork

Gamer Tester = Game Designer

STUDENT COPYRIGHT CHECKLIST

students to complete and advisor to verify

STUDENT: Answer question 1 below.

1) Does your solution to the competitive event integrate any type of music and/or sound? ☒ YES ☐ NO
   If NO, go to question 2.
   If YES, is the music and/or sound copyrighted? ☐ YES ☒ NO
   If YES, move to question 1A. If NO, move to question 1B.
   1A) Have you asked for author permission to use the music and/or sound in your solution and included that permission (letter/form) in your documentation? If YES, move to question 2. If NO, ask for permission and if permission is granted, include the permission in your documentation.
   1B) Is the music/sound royalty free, or did you create the music/sound yourself? If YES, cite the royalty free music/sound OR your original music/sound properly in your documentation.

CHAPTER ADVISOR: Sign below regarding your student's answer(s) to the use of music/sound in his/her competitive event solution. Even if your student answers "NO" to question 1, please sign below noting that you have evaluated the competitive event solution and the student answered the question(s) accurately.

I, [redacted] (chapter advisor), have checked my student's solution and confirm that any use of music/sound is done so with proper permission and is cited correctly in the student's documentation and/or the solution has been found to have no music/sound included.

STUDENT: Answer question 2 below.

2) Does your solution to the competitive event integrate any graphics/videos? ☒ YES ☐ NO
   If NO, go to question 3.
   If YES, is(are) the graphics/videos copyrighted, registered and/or trademarked? ☐ YES ☒ NO
   If YES, move to question 2A. If NO, move to question 2B.
   2A) Have you asked for author permission to use the graphics and/or videos in your solution and included a permission (letter/form) in your documentation for graphic/video used? If YES, move to question 3. If NO, ask for permission and if permission is granted, include the permission in your documentation.
   2B) Is(are) the graphics/videos royalty free, or did you create your own graphic? If YES, cite the royalty free graphics/videos OR your own original graphics/videos properly in your documentation.

CHAPTER ADVISOR: Sign below regarding your student's answer(s) to the use of graphics/videos in his/her competitive event solution. Even if your student answers "NO" to question 2, please sign below noting that you have evaluated the competitive event solution and the student answered the question(s) accurately.

I, [redacted] (chapter advisor), have checked my student's solution and confirm that the use of graphics/videos with proper permission and is cited correctly in the student's documentation and/or the solution has been found to have no graphics/videos included.

STUDENT: Answer question 3 below.

3) Does your solution to the competitive event use another's thoughts or research? ☐ YES ☒ NO
   If NO, this is the end of the checklist.
   If YES, have you properly cited other's thoughts or research in your documentation? ☐ YES ☐ NO

   CHAPTER ADVISOR: Sign below regarding your student's answer(s) to having integrated any thoughts/research of others in his/her competitive event solution. Even if your student answers "NO" to question 3, please sign below noting that you have evaluated the competitive event solution and the student answered the question(s) accurately.

   I, [redacted] (chapter advisor), have checked my student's solution and confirm that the use of the thoughts/research of others is done so with proper permission and is cited correctly in the student's documentation and/or the solution has been found to have all original thought with no use of other's thoughts/research.
